Objectives

- to promote an international network of co-operation regarding themes of common interest in the field of social sciences and humanities.
- to promote and facilitate the dissemination, transfer, exchange and exploitation of past and present research results
- to contribute directly to the European research area through strategic review, mobilization and creation of best practice in supportive infrastructure and through mapping out the competencies and skills in the field of governance and rural-urban relations.
- to prepare new research in this research area.
